- LABELING
- DISPLAY BUILDING
- STAFFING SERVICES

## VALUE-ADDED SERVICES

Value-added services increases the customization of a product and reduces costs by streamlining the finished goods at the end of the supply chain. This allows manufacturers to source inventory from multiple locations and stored at 3PL where all components are assembled and shipped to the consumer or retailer.

### Kitting & Bagging

We combine online orders at the SKU level to ensure they are processed efficiently/accurately.

### Bundling

Running a special promotion? New product launch? Bundling products together makes it possible.

### Custom Branded Packaging

Product branding is important; we will make sure branded packaging looks perfect every time. We also source packaging with our providers, if required.

### Light Assembly

As orders come in, your products are assembled in final form in our warehouse.

### Quality Inspection & Testing

Issues can arise during the transportation of products. To ensure a product's quality we will test, clean, inspect, contain, repack products when they arrive at our warehouse.

### Co-packing & Labeling

Use custom labeling to match your order processing system. Co-pack with other items as needed.

### Display Building

Products need to be represented perfectly in the retail environment. Evans stores and build retail displays to spec.

### Automated Technology

The value-added line uses automated machine vision/artificial intelligence as a quality assessment system. This adds another layer of accuracy and speed to our operations.
